Global wheat yield potential assessment

File name	Directory	description
GS_Baseline.xlsx	GS dates	Growth stages at the 34 global locations for the based period simulated with the wheat model SiriusQuality
GS_GCM1_RCP4.5.xlsx	GS dates	Growth stages at the 34 global locations for the 2040-2069 period under the future climate scenario RCP4.5 (climate model GFDL-CM3 simulated with the wheat model SiriusQuality
GS_GCM1_RCP8.5.xlsx	GS dates	Growth stages at the 34 global locations for the 2040-2069 period under the future climate scenario RCP8.5 (climate model GFDL-CM3) simulated with the wheat model SiriusQuality
GS_GCM2_RCP4.5.xlsx	GS dates	Growth stages at the 34 global locations for the 2040-2069 period under the future climate scenario RCP4.5 (climate model GISS-E2_R) simulated with the wheat model SiriusQuality
GS_GCM2_RCP8.5.xlsx	GS dates	Growth stages at the 34 global locations for the 2040-2069 period under the future climate scenario RCP8.5 (climate model GISS-E2_R) simulated with the wheat model SiriusQuality
GS_GCMK_RCP4.5.xlsx	GS dates	Growth stages at the 34 global locations for the 2040-2069 period under the future climate scenario RCP4.5 (climate model HadGEM2-ES) simulated with the wheat model SiriusQuality
GS_GCMK_RCP8.5.xlsx	GS dates	Growth stages at the 34 global locations for the 2040-2069 period under the future climate scenario RCP8.5 (climate model HadGEM2-ES) simulated with the wheat model SiriusQuality
GS_GCMO_RCP4.5.xlsx	GS dates	Growth stages at the 34 global locations for the 2040-2069 period under the future climate scenario RCP4.5 (climate model

		MIROC5) simulated with the wheat model SiriusQuality
GS_GCMO_RCP8.5.xlsx	GS dates	Growth stages at the 34 global locations for the 2040-2069 period under the future climate scenario RCP8.5 (climate model MIROC5) simulated with the wheat model SiriusQuality
GS_GCMR_RCP4.5.xlsx	GS dates	Growth stages at the 34 global locations for the 2040-2069 period under the future climate scenario RCP4.5 (climate model MPI-ESM-MR) simulated with the wheat model SiriusQuality
GS_GCMR_RCP8.5.xlsx	GS dates	Growth stages at the 34 global locations for the 2040-2069 period under the future climate scenario RCP8.5 (climate model MPI-ESM-MR) simulated with the wheat model SiriusQuality
CropNtoMaximizeYield_30yrsAve.RDS	Simulations	<p>Calculated simulated plant and soil responses at different N applicate rates:</p> <p>N450: for N fertlizer rate of 450 kg N/ha</p> <p>UL: for unlimited N supply fao.dose: for national N applicate rate</p> <p>fao.yield: for simulated gain yield equal the national grain yield (interpolated on simulated yield vs. simulated N fertilizer rate)</p> <p>current.dose: for national N fertilizer use for wheat</p> <p>opt: At N fertilizer rate that maximize simulated grain yield</p> <p>opt.gpc; At N fertilizer rate that maximize simulated grain yield with a minimum protein concentration of 12%</p> <p>opt.N: At N fertilizer rate that maximize simulated grain yield for standard cultivar</p> <p>opt.gpc.N: At N fertilizer rate that maximize simulated grain yield with a minimum protein concentration of 12% for standard cultivar</p>
merged summary_Step01(formated).RDS	Simulations	Simulation results for the Step 1 of the simulation protocol (unlimited N)

merged summary_Step02(formated) .RDS	Simulations	Simulation results for the Step 2 of the simulation protocol (N response curves)
AgMIPWheat4_site description_34_Global_sites.xlsx	Site information	Description of the 34 global sites
AgMIPWheat4_Soil_34_Global_sites.xlsx	Site information	Soil information for the 34 global sites
AgMIPWheat4_Weather data_34_Global_sites.rar	Site information	Daily weather data for the 34 global sites for the baseline period (1981-2020) and the future period 2040-2069 for the RCP4.5 and RCP8.5 scenarios taken from five global models of the CMIP5 climate model ensemble
AgMIPWheat4_variable_description.txt	Metadata	Definition and unit of the reported simulated crop and soil variables
Instructions-34 Global sites_N response curve.pdf	Metadata	Simulation protocol for the Step 2 (N response curves)
Instructions-34 Global sites_Step1	Metadata	Simulation protocol for the Step 1 (unlimited N)
Site_codes__coordinates_national_yield_fertilizer_use.text	Metadata	Code, coordinated, national aggregated grain yield and N fertilizer use for wheat for the 34 global locations
